

The Role of Expert Mesoanalysis in Collaborative Severe Weather IDSS

Kim.Runk (NOAA/NWS/OSTI/OPG, Kansas City, MO)

This presentation will focus on a series of proof-of-concept experiments conducted by the NWS OPG in 2019, colloquially referred to as "Mesoanalyst Boot Camp." The talk will cover background, purpose, objectives, and unique experiential learning structure of the experiments. We will also share some of the key takeaways from participant surveys, which will form the basis of findings and recommendations to be delivered to NWS leadership.
