

## **NWS Cloud Possibilities - a Vision for the Future**

Kenneth Sperow (NOAA/NWS/OSTI/STI14, Silver Spring MD)

The Cloud offers virtually infinite resources (compute, storage) and possibilities. This talk will outline ways the NWS could leverage the Cloud to transform the agency and streamline R2O/O2R. The focus will be on the next five years, highlighting transformations already underway, prototypes, and dreams, with an emphasis on development, testing, and training, but applicability to operations. Be ready to share your Cloud vision!
