NDFD Statistics Viewer Demonstration

Dana Strom (NOAA/NWS/OST/MDL, Silver Spring, MD) and John L Wagner (NOAA/NWS/OST/MDL, Silver Spring, MD)

A demonstration of MDL's new NDFD Statistics Viewer will be given. This viewer provides users with multiple ways to view verification metrics for the NDFD, National Blend of Models, and other sources.   We will be discussing basic usage of the site and how to utilize the provided statistics for decision making. Features that were not present on the legacy viewer will be highlighted, including generating verification over custom date ranges and performance diagrams.
