TDL OFFICE NOTE 96-4

PUBLICATIONS OF MEMBERS OF
THE TECHNIQUES DEVELOPMENT LABORATORY
1989-1997

Harry R. Glahn and J. Paul Dallavalle

December 1996

PUBLICATIONS BY MEMBERS OF THE TECHNIQUES DEVELOPMENT LABORATORY
1989-1997

Harry R. Glahn and J. Paul Dallavalle

INTRODUCTION

This office note updates TDL Office Note 89-5 (Glahn 1989) which lists publications by Techniques Development Laboratory (TDL) employees. The initial office note listed documents from 1964 to 1989. The current office note contains a complete list for 1989 and continues by year until 1997. Obviously, the listing for 1997 is premature at this time, but encompasses articles that are in the process of being published. As was stated in Glahn (op. cit.), "publication dates do not necessarily coincide with when the work was done or the paper written. To be included in this list, some involvement of the author with the paper while at TDL was necessary, or affiliation with TDL was mentioned in the paper."

This office note includes contributions to books and journals, publications in the NOAA technical memorandum series, NOAA computer program series, TDL office notes, Technical Procedures Bulletins (TPB's) written by TDL authors, and extended abstracts published in conference or symposium programs. Note that the latter two types of documentation were not listed in the first office note. Since the National Weather Service's Office of Meteorology now attributes the TPB's to specific authors and the TPB's are subjected to a rigorous review process, we have included them in the publication list. Theses and dissertations are not included in this office note, nor are TDL contributions to various progress reports (for example, the World Meteorological Organization reports on numerical weather prediction).

ACKNOWLEDGMENTS

Adams, S. A., 1989: Structure flow diagram generator. <u>NOAA Techniques Development Laboratory Computer Program</u> NWS TDL CP 89-1, National Weather Service, NOAA, U.S. Department of Commerce, 12 pp.

_____, 1989: String search. <u>NOAA Techniques Development Laboratory Computer Program</u> NWS TDL CP 89-2, National Weather Service, NOAA, U.S. Department of Commerce, 12 pp.

Battel, G., 1989: Wind profiler applications software development plan. <u>TDL Office Note</u> 89-3, National Weather Service, NOAA, U.S. Department of Commerce, 16 pp.

Carter, G. M., J. P. Dallavalle, and H. R. Glahn, 1989: Statistical forecasts based on NMC's numerical weather prediction system. <u>Wea. Forecasting</u>, 4, 401-412.

Charba, J. P., and J. T. Moeller, 1989: Use of operational 0-6 and 3-9 h quantitative precipitation forecasts for predicting heavy rain events. <u>NOAA Technical Memorandum</u> NWS TDL-80, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 34 pp.

Dagostaro, V. J., C. L. Alex, G. M. Carter, J. P. Dallavalle, and P. D. Polger, 1989: Evolution of the NWS national verification system: Past, present, and future. <u>Preprints 11th Conference on Probability and Statistics in Atmospheric Sciences</u>, Monterey, Amer. Meteor. Soc., J41-J46.

_____, G. M. Carter, and J. P. Dallavalle, 1989: AFOS-era verification of guidance and local aviation/public weather forecasts--No. 10 (April 1988 - September 1988). <u>TDL Office Note</u> 89-6 , National Weather Service, NOAA, U.S. Department of Commerce, 56 pp.

Glahn, H. R., 1989: The Techniques Development Laboratory--The first 25 years. <u>Preprints 11th Conference of Probability and Statistics in Atmospheric Sciences</u>, Monterey, Amer. Meteor. Soc., J20-J27.

_____, 1989: Publications of members of the Techniques Development Laboratory, 1964-1989. <u>TDL Office Note</u> 89-5, National Weather Service, NOAA, U.S. Department of Commerce, 68 pp.

_____, and W. L. Wolf, 1989: Simulation of AWIPS-90 technique processing load for a WFO. <u>TDL Office Note</u> 89-7, National Weather Service, NOAA, U. S. Department of Commerce, 28 pp.
